TRINNOV |  HIGH-END

Shaping The Future

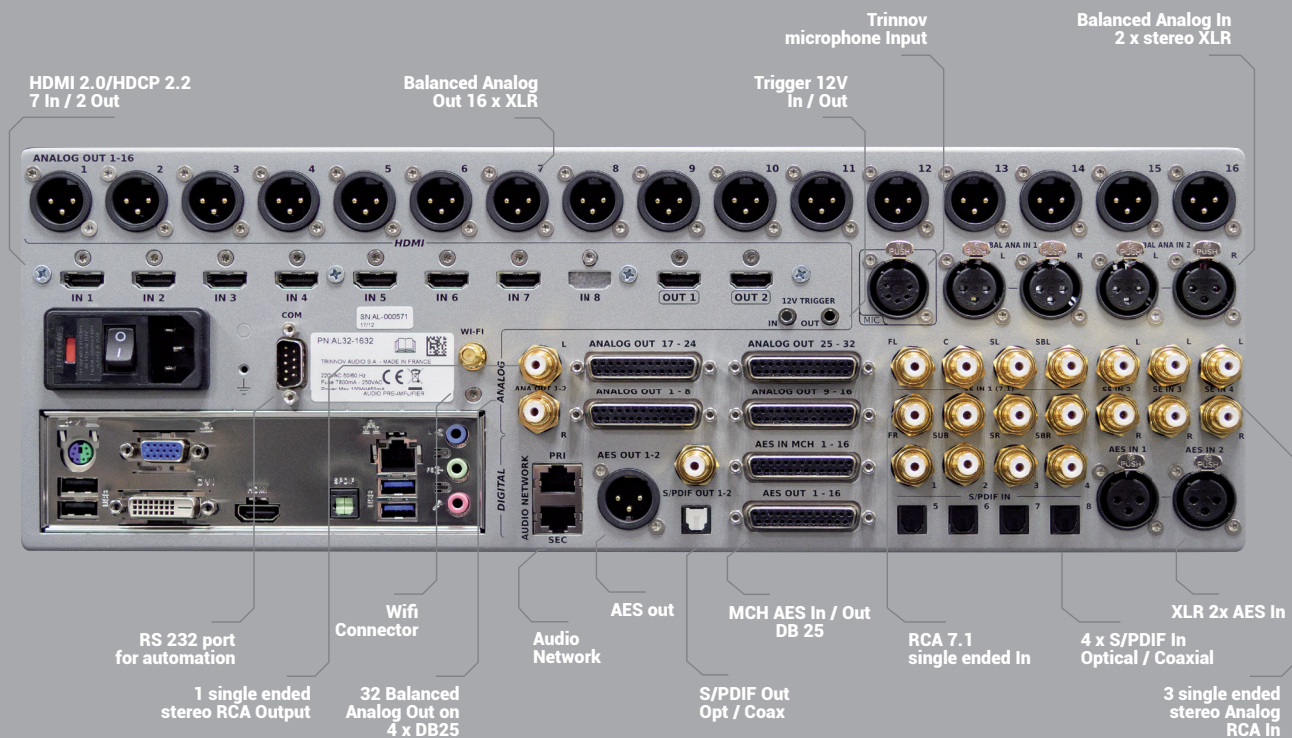

We shaped the Altitude³² to ensure an undisputed leadership in 3D sound, leaving nothing to chance: high channel count, huge processing capabilities to meet the highest technical requirements, and exclusive patented technologies to unleash the full potential of immersive sound, regardless of formats and speaker layouts.

Ultimate Audio Experience

- 64 bits floating point & 24 bits / 192 kHz native processing.
- Accurate 3D Audio playback with Loudspeaker Remapping.
- Advanced bass management (up) to 32 subwoofers.
- Automatic calibration up to 4-way Active Crossovers.
- Fully Compliant HDMI 2.0/HDCP 2.2 Board.

Immersive Audio Decoders

- Dolby Atmos™ (32 discretely-rendered channels)
- Auro-3D™ (supports Auro's full 13.1 layout)
- DTS:X™ (all configurations of its 11.1 format)
- DTS:X Pro™ (32 discretely rendered channels)
- IMAX® Enhanced
